

Course title

Managing and Monitoring Progress OpenEdge

Course duration

Equivalent to 4 hours of instructor-led training

Audience

This course is for database and application administrators.

Description

This course describes the architecture of OpenEdge Management, teaches you how to use the OpenEdge Management console. It also tells you how to configure OpenEdge Management users, and manage and monitor system resources, network resources, OE Web Server resources and REST Applications; and OpenEdge resources.

Materials you receive include a Course Guide – which includes hands-on labs and step-by-step solutions – as well as a CD with example code and lab files with solutions.

This course is also available online with a subscription to the [Progress Education Community](#).

Version compatibility

This course is compatible with Progress OpenEdge 11.5.

Role-based learning path

This course is a part of the following role-based learning path:

- OpenEdge 11 Administrator
-

What you will learn

After taking this class, students should be able to:

- Describe the architecture of OpenEdge Management
 - Launch and navigate through the OpenEdge Management console
 - Use the OpenEdge Management console to configure OpenEdge Management users, and manage and monitor system resources, network resources, OE Web Server resources and REST Applications; and OpenEdge resources
 - Configure monitoring plans, log file monitors, jobs, reports, and collections
-

Prerequisites

Before taking this course an administrator must have knowledge of database administration and AppServer administration.

Learners can take up the Database Administration course from the [Progress Education Community](#).
