

Course title

Introduction to Progress OpenEdge Integration

Duration

Equivalent to 1 hour of learning

Audience

Advanced OpenEdge Developer

Description

In the *Introduction to Progress OpenEdge Integration* course, you learn about different ways to integrate a Progress OpenEdge ABL application with external non-Progress applications. First, you learn about different ways of exposing an ABL application to external applications. Then, you learn about the different ways in which your ABL application can access external applications. For each integration option, you learn about its runtime architecture and the high-level steps that an application developer must perform to implement it.

The materials that you receive with this course include a Course Guide.

This course is also available online with a subscription to the [Progress Education Community](#).

Version compatibility

This course is compatible with OpenEdge 12.2.

What you will learn

After taking this course, you should be able to:

- Describe the ways of exposing ABL applications to external applications.
 - Describe the ways of enabling ABL applications to access external applications.
-

Prerequisites

You should already be familiar with:

- OpenEdge components
 - OpenEdge process architecture
 - Familiar with technologies such as Web services, Restful State Transfer (REST), Enterprise Service Bus (ESB), and Java Message Service (JMS)
-
